

Informal Solicitation Addendum #2

Informal Solicitation for RainWise Green Stormwater Installation Project at Willis House
(Solicitation #5103)

Date of Addendum #2: August 22, 2018

The Informal Solicitation for the above named project is amended as noted in this Addendum. This Addendum consists of 2 Addendum pages plus 28 pages for a revised wage attachment and benefit code key to Addendum 2.

This Addendum provides responses to written inquiries/questions received prior to the deadline for written questions of Friday, August 17, 2018 at 1:00 p.m.

The deadline for proposals is hereby extended from Wednesday, August 22, 2018 at 1:00 p.m. to Monday, August 27, 2018 at 1:00 p.m.

Item 1. Discard the Washington State Prevailing Wages originally made available with the solicitation materials with the effective date of August 22, 2018.

Replace the discarded wage information noted above with the attached Washington State Prevailing Wages for the Effective Date August 27, 2018.

Item 2. Clarification: One of the potential proposers who attended the pre-proposal conference submitted the following inquiry:
"Rain Gardens. I walked the entire perimeter, assessing locations for rain gardens. While the site is rain garden eligible, the required setbacks and tree and tree roots make it unsafe and impractical. I look at the North side as the only area where there may be enough space. The Northeast corner has a rockery on the street side and basement on the other. There is 10 foot required setback from the basement and a 2 X rockery height, or 8 feet, setback from the rockery. This leaves a narrow 4 foot strip to place a rain garden. There also appears to be abundant underground utilities there, and a further utilities locate would be needed. The NorthWest corner has a large evergreen with an extensive root system and newly planted trees that make it unsafe if we cut major root stems. Here an arborist would need to define the safe zone to dig, and again a utilities locate would be needed to further clear the site. This will affect whether or not I submit a rain garden design and budget proposal."

SHA Clarification: The scope of work for this project provides an option for a rain garden, but it is not a requirement. Proposals may include cistern(s) only, or cistern(s) with rain garden. It is SHA's preference that existing trees remain intact.

Item 3. The following is a list of questions received and SHA's responses to those questions.

Question 1. Screening. Your solicitation asks for cistern screening. Does SHA have screening standards we can follow, such as do you prefer shrub and vegetation screening or something constructed?

Response: SHA does not have official standards for cistern screening. SHA property management and maintenance prefer the most affordable, lowest maintenance, and aesthetically pleasing option – which may or may not include low/no- maintenance vegetation or a constructed screen.

Question 2. External horizontal piping will have to be attached to the building exterior in several places in order to consolidate downspout pipes to specific cistern locations. Does SHA have a preferred method of attaching pipes to the building, such as pipe tape strapping or channel/clips (used to attach exterior electrical conduit)?

Response: clips would be preferred, using stainless steel fasteners.

Question 3. Another comment/question related to the exterior pipe. It is white, Schedule 40 PVC, and I assume you will want it painted to match the building exterior. Please confirm.

Response: SHA will need to see elevations, photos and possible addresses of previous projects on how the drain system appears or functions on the buildings. SHA would rather not use PVC on the exterior of the building.
