

Thank

I have friends and SHA staffs is my family, no matter how much we lose in our life and how hurt we are, but to be surrounded with those who really cares are amazing,

I wish there is a other big world to say thank more closer to the heart because I think it not enough by saying thank. SHA gives us hopes, they give us a safe and secure places to live, places to raise our children. places that we call a home. places where young adult can be more supportive services for us, and self sufficient.

I would thank them for their dedication and commitment to myself and others. I would thank SHA for encouraging us to be self supportive. I would thank them for treating my family and others as if we was their own.
