

Tips on Passing Inspections of Your Unit

SHA units may be inspected at any time during the year with proper notice. The checklist below will help you pass your next inspection.

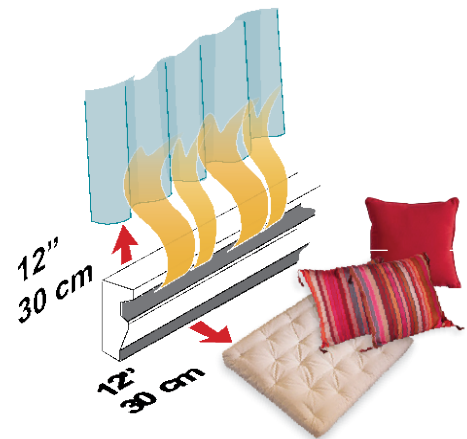

My windows, doors, electrical panels, and hot water heaters are accessible and not blocked by furniture or other items.

Garbage is properly stored in waste containers inside and outside of my unit. My home is easy to walk through.

My curtains, drapes, clothes and other flammable items are not near my heaters. My gas powered-equipment is stored outside.

I have reported all damaged outlet covers, leaky plumbing, and broken appliances to property management.
